

Redefining the Future of **Engineering** with **DynamicX PLUS**

At Dynamic X Plus, we turn complex engineering ideas into impressive visual experiences. Using CGI, simulations, and immersive technology, we help engineers, manufacturers, and innovators present their products with accuracy and clarity.

From realistic CGI product visualisation to interactive VR/MR simulations, our advanced visual tools make even the most technical concepts easy to understand and engaging. With Dynamic X, your engineering designs come to life, building confidence and interest with every audience.

Join us in shaping the future of engineering visualisation, where technology and creativity come together to create new possibilities.

what We offer

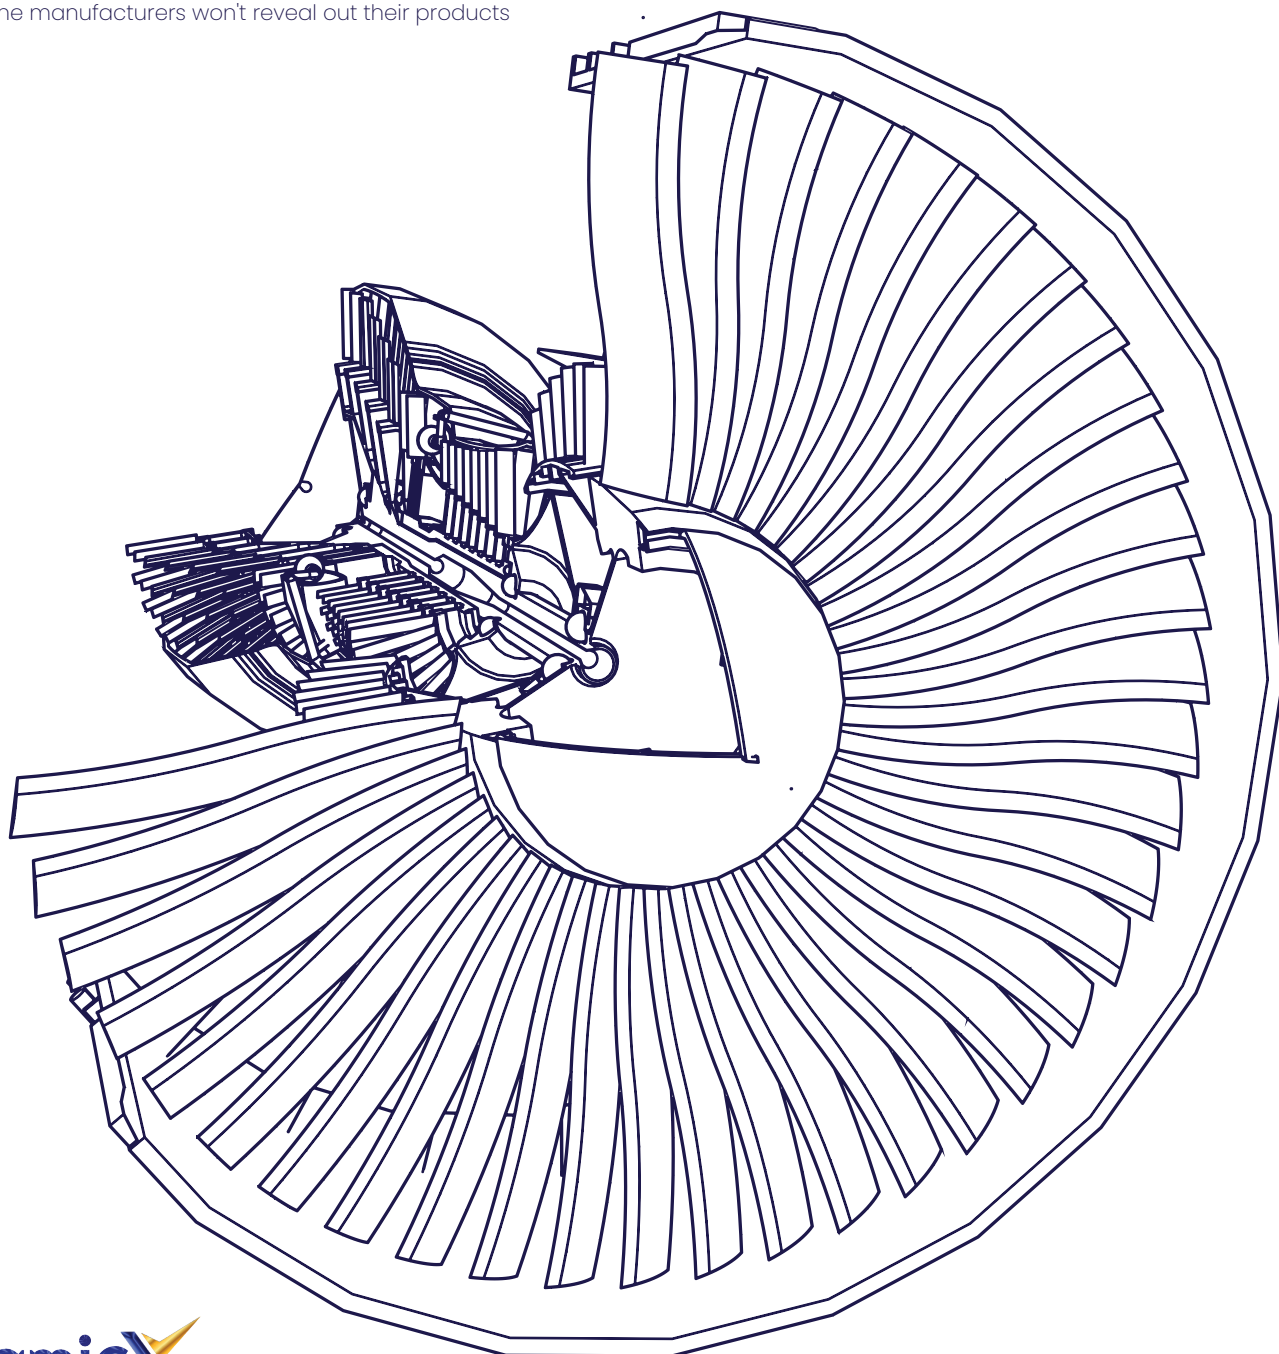

Our Services

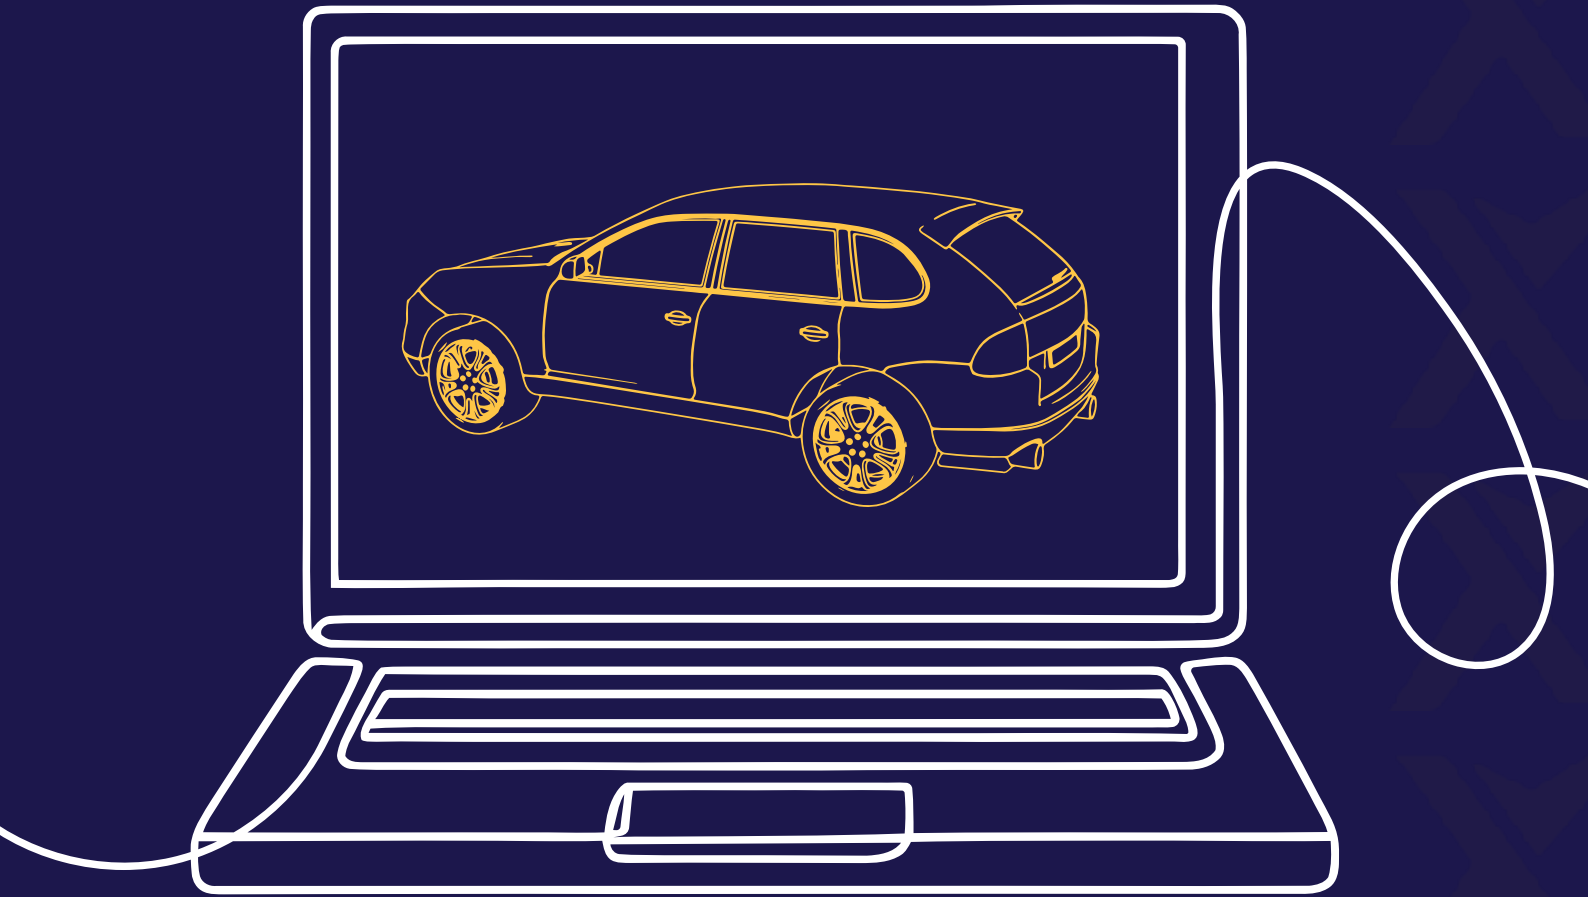

At Dynamic X, we bring advanced engineering concepts to life with cutting-edge CGI and immersive solutions designed to inspire. From CGI Product Visualisation that highlights every detail with photo realistic accuracy, to CGI Simulation Videos that demonstrate performance and functionality under real-world conditions, we ensure your innovations are presented with clarity and impact. Our VR/MR Product Simulation Applications immerse users in interactive environments, offering unparalleled insights and engagement. Whether for showcasing designs, validating concepts, or enhancing understanding to audience, our solutions empower engineering professionals or manufactures to present their product with accuracy, innovation, and confidence.

CGI Product Visualisation

Enhance your product presentation with CGI Product Visualisations that offer lifelike images of your engineering designs. Show off detailed components, textures, and finishes with exceptional clarity and precision. Whether for prototypes, final products, or marketing materials, these visuals provide a powerful way to showcase the quality, innovation, and artistry of your engineering solutions.

Majority of the manufacturers won't reveal out their products

[Explore More](#)

CGI Simulation Videos

See how your engineering products perform in real-world conditions with CGI Simulation Videos. These videos show how your products work under different scenarios, providing insights into performance, stress testing, and mechanical processes. From fluid dynamics to structural strength, our simulations make complex engineering ideas easy to understand, help validate designs, and demonstrate your product's reliability to stakeholders.

VR/MR Product Simulation Applications

Immerse your clients in the engineering world with VR/MR Product Simulation Applications. These interactive tools allow users to explore your products in virtual or mixed reality settings. Simulate real-world uses, test features, and see how your products work in an interactive virtual or mixed reality environment. Perfect for product demonstrations, and client engagement, these applications provide a unique way to showcase your innovations or product features understanding and decision-making.

Why Choose Dynamic X Plus for Advanced Engineering?

Technical accuracy

Tailored visuals and simulations that accurately represent

Engineering designs

Maximum Engagement:
Immersive tools and visuals that captivate audiences and
simplify complex ideas.

Seamless Collaboration:

Visualisations that aid communication between teams,
stakeholders, and clients.

Our Value Models

Fixed Price

You set the budget, we stick to it. The full scope, requirements, terms, and specifications are agreed upon before the start of the project and can't be changed later.

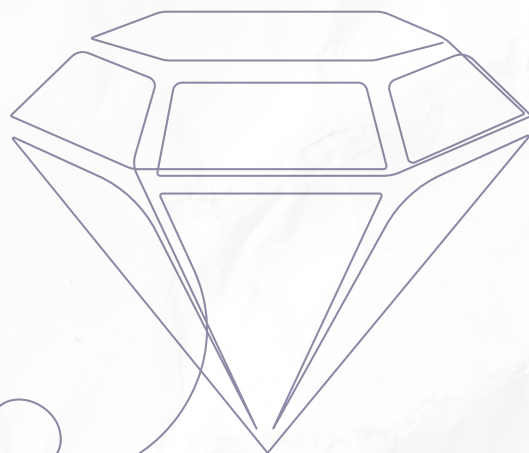

Time & Material

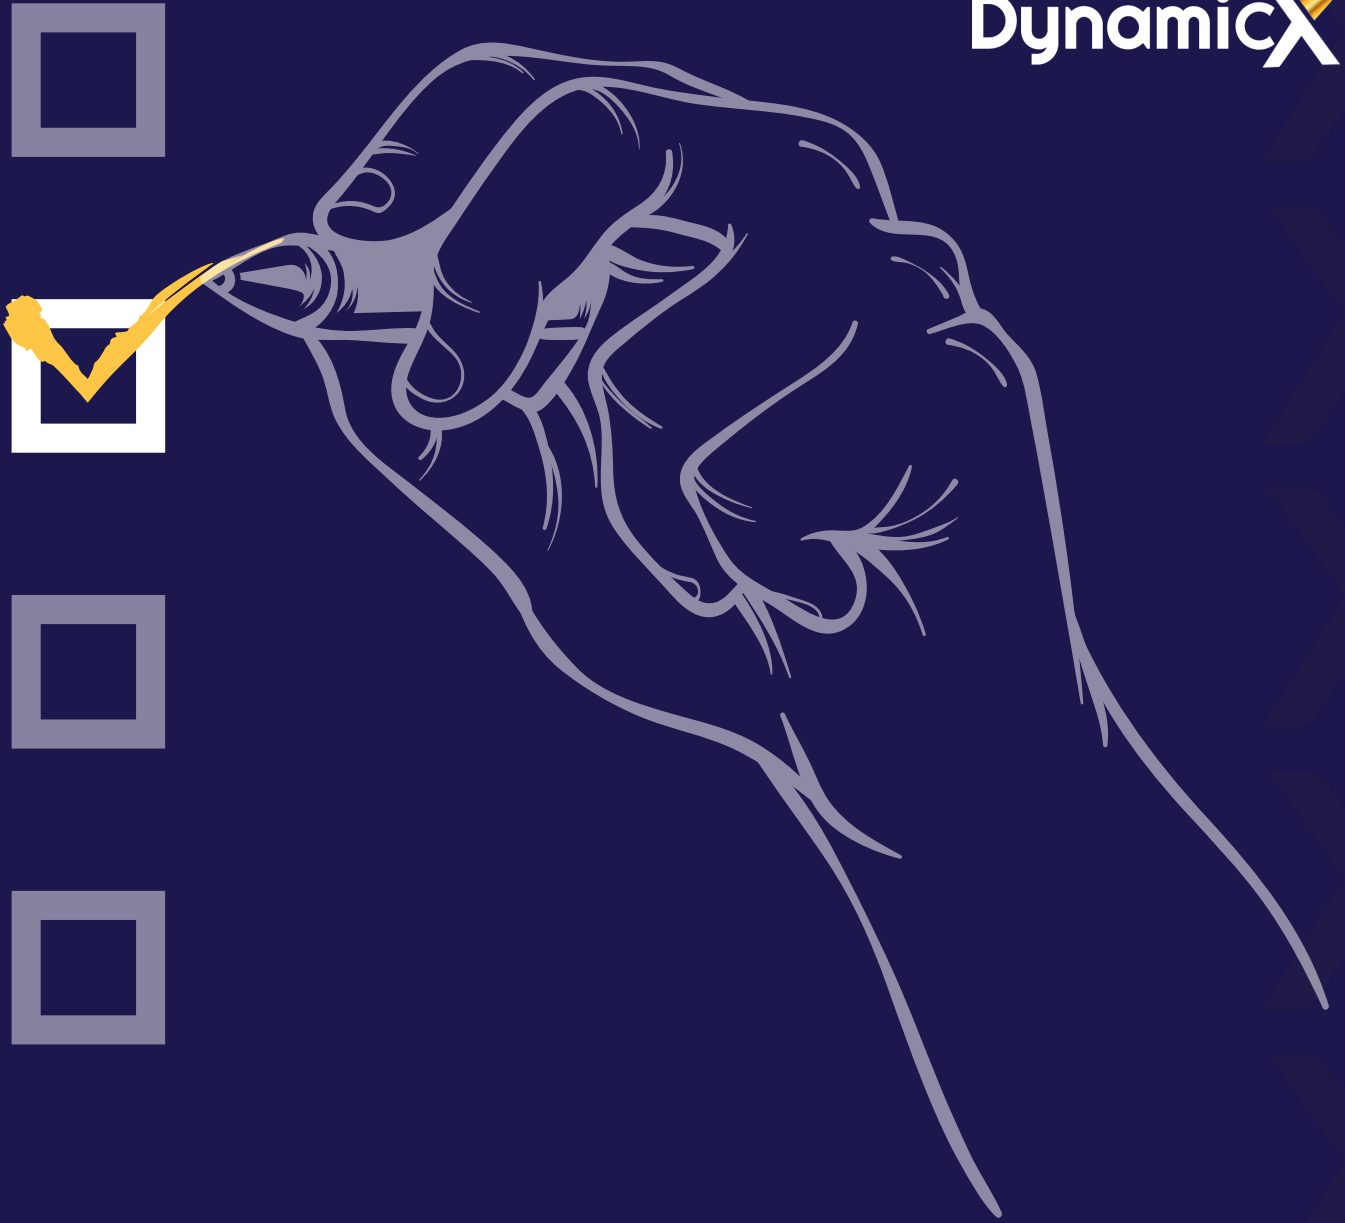

This calculates cost based on time and material spent, leaving room for changes to the budget and scope of the project over time.

Dedicated Team

A complete team (or a single expert from our staff) joins your existing specialists on the project. This team stays under your management and can be scaled up/down over time.

What You Can Choose

Flexible contract terms and hourly rates
 Exact development plan and documentation
 Clearly predefined requirements and timelines
 Fixed estimation of project costs
 Scalability and flexibility of term
 Easy communication with any team member
 Strong PM and all round QA included
 IP protection and NDA
